Dong-Er Zhang, PhD
Distinguished Professor of Pathology
Dept. of Molecular Biology
University of California San Diego

Dr. Zhang’s lab studies the molecular basis of cancer development, progression and treatment. Her lab uses molecular biology, protein biochemistry, cell biology and animal models to address questions related to blood cell differentiation, transformation and innate immune responses.

Nicholas Lopez-Galvez, PhD
Assistant Professor in Environmental Health
San Diego State University

Dr. Nicholas Lopez-Galvez has over a decade of experience evaluating exposures to carcinogens such as pesticides and tobacco-related pollutants among underserved populations.

Dennis Trinidad, PhD
Professor of Public Health
Assistant Dean for Faculty Affairs
Herbert Wertheim School of Public Health & Human Longevity Science
UC San Diego

Dr. Trinidad has been a tobacco control researcher for 24 yrs. And an administrator of complex academic and research training programs. His research focuses on population-level studies of tobacco and tobacco related disparities.

Nissi Varki, M.B.B.S. (MD)
Professor of Pathology
University of California San Diego
Basic research analyzing the mechanisms of cancer metastasis. Histotechnology and histopathology of cancer

Teresa Monkkonen, PhD
Assistant Professor of Biology San Diego State University
Understanding how the tumor microenvironment (i.e. non-tumor cells) controls breast cancer progression using in vivo and cell culture models. Her work also focuses on evaluating the molecular biology influencing breast cancer patient disparities and outcomes.

Emily Meier, PhD
Clinical Psychologist
UC San Diego Health
Improving the quality of life of patients with cancer and other complex illnesses by providing patients and families with relief from psychological, social, spiritual or other types of distress

THURSDAY, JUNE 9, 2022 12-1PM

JILL MESIROV, PhD
Professor & Assoc. Vice Chancellor Computational Health Sciences University of California San Diego
Dr. Mesirov focuses on cancer genomics, analyzing molecular data to determine underlying biological mechanisms of tumor subtypes, as well as developing practical, accessible biomedical software tools.

FERHAT AY, PhD
Associate Professor Computational Biology La Jolla Institute for Immunology
Dr. Ay develops computational methods that are based on statistics, machine learning, optimization and graph theory. He is particularly interested in the analysis and modeling of the 3D genome architecture from high-throughput chromatin conformation capture data to understand how they affect cellular outcome.

CARRIE HOUSE, PhD
Assistant Professor Biology Department San Diego State University
Dr. House studies cancer progression, therapy resistance and disease relapse, with focus on the role of the tumor microenvironment and cancer stem cells in mediating survival and drug resistance pathways in ovarian and breast cancers.

ROBERT SIGNER, PH.D.
Assistant Professor
Department of Medicine

COLLEEN MCHUGH, PH.D.
Assistant Professor
Department of Chemistry & Biochemistry

DAVID SCHLAEPFER, PH.D.
Professor
Department of Biological Sciences

Using stem cells for their potential to treat degenerative, malignant, and age-related diseases

Studies the assembly of non-coding RNA and protein complexes in mammalian cells, particularly long ncRNAs associated with human cancers

Goal is to understand how cancer spread from their tissue of origin to other sites in the body, focusing on molecular signaling events, in particular FAK

David Brenner, MD
Vice Chancellor, Health Sciences
UC San Diego

Dr. Brenner, a distinguished physician-scientist and leader in the field of gastroenterological research. He earned his medical degree from Yale University School of Medicine.

Vineet Bafna, PhD
Professor of Computational Sciences & Engineering
UC San Diego

Dr. Bafna’s research incorporates algorithmic methods into the analysis of molecular biology data and has co-authored 150 research articles in the leading journals in the field.

Stephen Schoenberger, PhD
Professor, Center for Cancer Immunotherapy
La Jolla Institute of Immunology

Adjunct Professor of Medicine in the Division of Hematology & Oncology at the Moores Cancer Center. He received his PhD in Microbiology & Molecular Genetics from UCLA in 1993. He is a translational cellular immunologist working on precision cancer immunotherapy.

YUAN CHEN, PH.D.
Professor of Surgery
Dr. Chen's lab studies cell function, immune response and developing potential new therapies for cancer.

JACK BUI, MD/PHD
Professor of Pathology
Dr. Bui’s lab studies how to initiate innate immune responses to cancer.

SHIZHEN EMILY WANG, PhD
Associate Professor of Pathology
UC San Diego
Dr. Wang studies mechanisms mediated by cancer-secreted extracellular vesicles, their microRNA, and protein cargo.

EYAL OREN, PhD, MS
Interim Director
School of Public Health
San Diego State University
Dr. Oren is an epidemiologist interested in behavioral aspects of infectious disease, with an emphasis on respiratory health.

ERIC AHRENS, PhD
Professor of Radiology
Director, Stem Cell Molecular Imaging
UC San Diego
Dr. Ahrens’ research involves imaging innovations and adapting MRI to visualize molecular and cellular events in vivo.

LYUDMILA BAZHENOVA, MD
Professor of Clinical Medicine
Department of Medicine

Dr. Bazhenova’s clinical practice and research focus on a multidisciplinary approach to lung cancer, particularly as this relates to females and non-smokers. She also designs and implements clinical trials.

LESLIE CREWS, PhD
Assistant Professor
UCSD Division of Regenerative Medicine

Dr. Crews investigates the function of cancer stem cells in multiple myeloma progression and relapse, and is pioneering novel myeloma stem cell-targeted RNA detection tools for diagnosis and treatment.

CHRISTOPHER KANE, MD
Professor of Urology
UCSD School of Medicine Dean of Clinical Affairs

Dr. Kane is a specialist in prostate cancer and an expert in robotic and other minimally invasive procedures for urologic surgery. He also serves in dual-leadership roles of dean of clinical affairs for UCSD School of Medicine and chief executive officer for UCSD Health Physician Group.

David Strong, PhD
Professor, Family Med & Public Health

Dr. Strong is a professor and the Director of the Health Behavior Science Track for the UCSD/SDSU Joint Doctoral Program (UCSD/SDSU JDP) in Public Health who studies the intersection of mental health and addiction.

Ezra Cohen, MD
Associate Director
Moore’s Cancer Center

Dr. Cohen is a board-certified oncologist and an internationally renowned cancer researcher. He cares for patients with all types of head and neck cancers, including esophageal, thyroid and salivary gland cancers.

Olivier Harismendy, Ph.D. Assoc. Professor, Medicine
Dr. Harismendy is an Associate Professor at UCSD Moores Cancer Center and head of the oncolgenomics lab focusing on finding novel biomarkers for cancer prognosis and treatment.

Richard Cripps, D.Phil. Professor of Life Sciences
Shiley BioScience Center
Dr. Cripps is a professor who specializes in heart and skeletal muscle development & disease, myofibrillar proteins and using CRISPR to determine roles in muscle assembly.

Jason Sicklick, MD, FACS
Surgical Oncologist
Assoc. Professor of Surgery
Dr. Sicklick is a general surgeon and surgical oncologist who specializes in treating hepatobiliary diseases and sarcomas, including gastrointestinal stromal tumors (GIST).

SPACE IS LIMITED.
