

**UNIVERSITY OF CALIFORNIA - SAN DIEGO
CONSENT TO ACT AS A RESEARCH SUBJECT**

Vaccine Trials Volunteer Screening Registry

The AntiViral Research Center (AVRC) at the University of California, San Diego (UCSD) is conducting research about Monkeypox. We are collecting information about members of the community who are interested in participating Monkeypox research.

You may be eligible to participate in one or more of these research studies. If you agree, you will complete a questionnaire about yourself and your health to see if you are eligible. Benefits of participation may vary but may include test results, treatments and/or compensation. All personal information is strictly confidential. Study participation is voluntary and done for research purposes only.

There is a risk of loss of confidentiality when you provide your name and contact information. We will do everything we can to protect your privacy and will never share your information. There is no direct benefit for providing your contact information and agreeing to be contacted about research studies, but you may learn of a study that interests you. You will not be compensated for providing your information.

The alternative to completing this form is choosing to not participate. If you decide later that you no longer want to be contacted about research studies at AVRC you can tell us when we contact you. We'll remove your information from our contact list. .

If you are interested in completing the questionnaire and hearing more about research so that you can choose whether or not to become involved, please continue to the questionnaire.

By completing the screening questionnaire, you are agreeing to allow researchers to review information and contact you about being in a research study. You are not committing to become involved in any study.

I am interested in learning more about research studies being conducted by the AVRC.
